

THE HEALING EFFECT OF STRUCTURED WATER

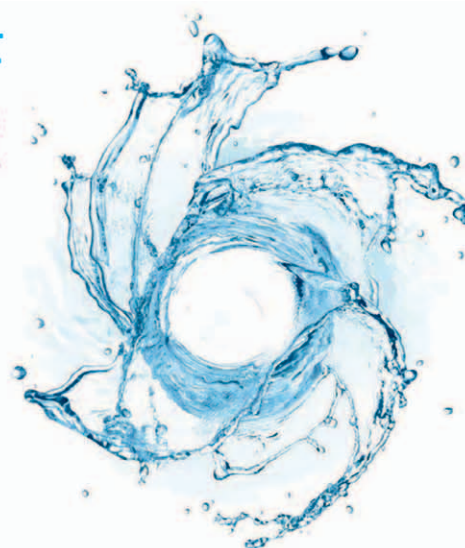

Here Sandra Kendrew explains the beneficial properties of structured water.

STRUCTURED WATER is natural water found in nature, which is free from toxins and the water's memory. It becomes structured as the water makes its way down a mountain stream, twisting back and forth, so that by the time the water reaches the bottom of the stream it will be structured - and filled with life force energy, balanced pH, oxygen and minerals.

When we are born we have naturally 80% structured water in our bodies, but this depletes with age, due to toxins, pollutants and medicines. When we drink structured water we can help the body to maintain this

healthy balance, as well as aiding in boosting the immune system, since structured water is full of healing life force energy. Structured water resonates at 528 hertz, which is the healing vibration. Some people call it the vibration of love and, surprisingly, meditation music is often at 528 hertz, as are many of Mozart's music pieces.

You can make your own structured water by simply squeezing the juice of half a lemon into a glass of water, or you can of course use Natural Action Technologies Water Units, which enables you to have constant structured water throughout the property. These units emulate how

water moves in nature, so it will guide the water through a multiple vortex and specially tuned geometry; the water spins and flows in both directions several times, making it structured. This process helps to neutralise both the toxins in the water and the electromagnetic fields (EMFs) within a home, plus with increased life force energy, it may help to improve your overall health.
